

MOUNTING SUPPORT FOR HANDRAILS MS2

ASSEMBLY BY A SINGLE PERSON: SAFE AND ACCURATE

With this mounting support you can now easily mount handrails. Vacuum feet keep the mounting support securely in its place. Assembly can be performed by a single person: A useful aid for many assembly activities.

Hanging and aligning

Depending on the size of the handrail to be mounted, attach the mounting supports to the floor with their suction feet. Then hook in the handrail and fix it in place. By means of the quick-release levers you can now easily align the handrail without time pressure.

Fastening

Depending on the type of fastening, the brackets are welded or screwed on. Then, they can be conveniently mounted. How the assembly is ultimately carried out always depends on the brackets used and whether they have already been fitted previously. What is always true, however, is that the entire assembly is greatly simplified with the help of the mounting supports, especially for spiral staircases. →

BENEFIT FROM THE ADVANTAGES OF THE MS2

- Alignment of the handrail by a single person
- Secure positioning on finished flooring due to suction feet
- Adjustable in all directions
- Fine adjustment by quick release levers
- Holder for all common handrail diameters

MOUNTING SUPPORT FOR HANDRAILS MS2

Holder

The holder can be easily adjusted to all common handrail diameters.

Quick-release levers

The aluminium quick-release levers ensure quick and safe adjustment.

Protection

Thanks to rubber lined holders, even handrails with delicate surfaces can be securely clamped.

Suction feet

High-quality suction feet allow attachment to gas-tight surfaces such as marble, glass, varnished wood and tiles. If no suitable substrate is available, you can use a sheet metal plate as a base.

TECHNICAL DATA

- Material: S355 / galva. Zinc
- Dimensions (HxWxD): 730 x 410 x 120 mm
- Weight: 3.7 kg
- Max. load: 10 kg
- Height min.: 665 mm
- Height max.: 1135 mm
